Test Case 1 – Flipkart Homepage

Test Case ID: WB01

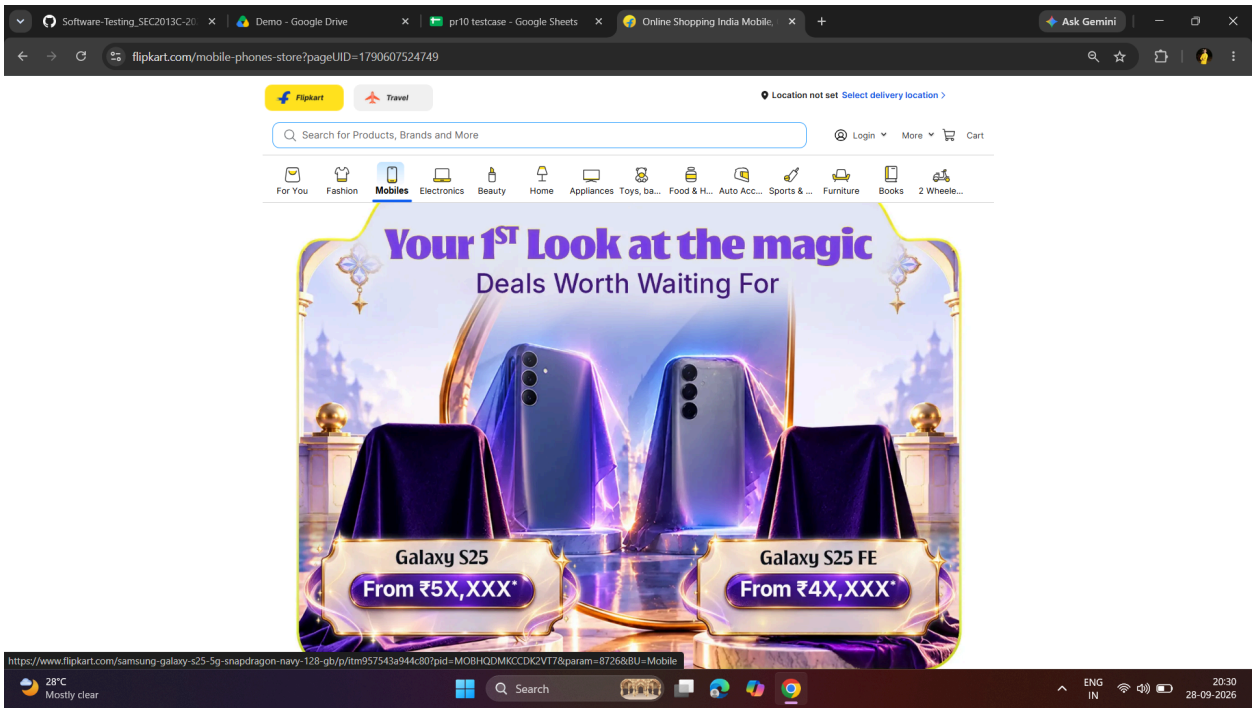

Test Case: Verify Flipkart homepage is displayed

Test Steps: Open the Flipkart website in the browser.

Expected Result: Flipkart homepage should be displayed with search bar, Login, Cart and product categories.

Actual Result: Flipkart homepage was displayed successfully with search bar, Login, Cart and product categories.

Status: PASS

Test Case 2 – Product Search

Test Case ID: WB02

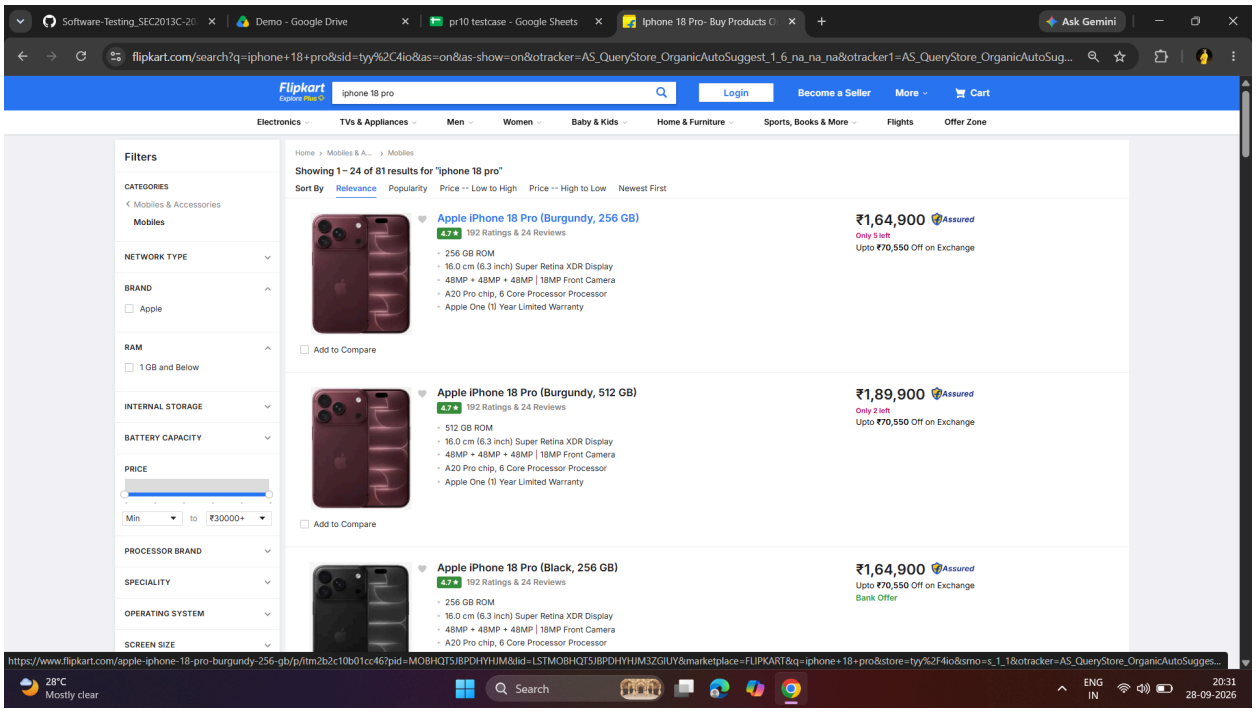

Test Case: Verify product search functionality

Test Steps: Open Flipkart and search for **iPhone 18 Pro** using the search bar.

Expected Result: Search results related to iPhone 18 Pro should be displayed.

Actual Result: iPhone 18 Pro search results were displayed successfully.

Status: PASS

Test Case 3 – Search Results

Test Case ID: WB03

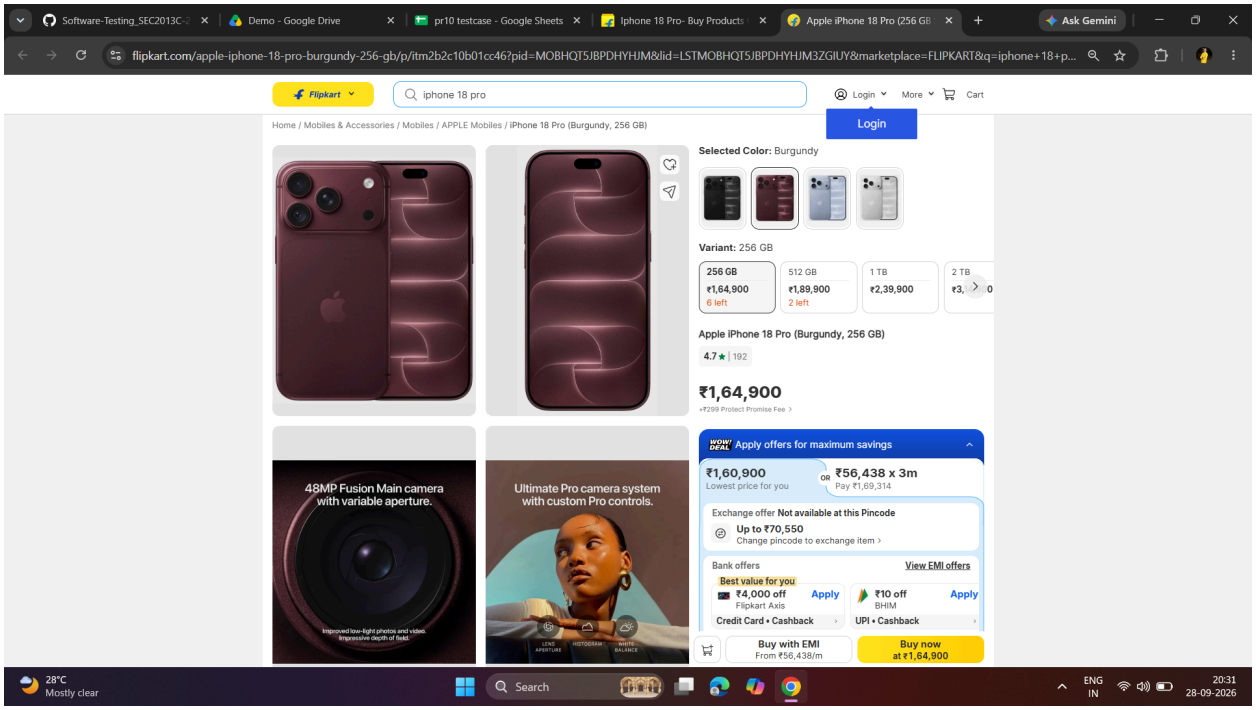

Test Case: Verify iPhone 18 Pro products are displayed

Test Steps: Search for iPhone 18 Pro and check the displayed product listings.

Expected Result: Relevant iPhone 18 Pro products should be displayed with product name, image and price.

Actual Result: iPhone 18 Pro products were displayed with product name, image and price.

Status: PASS

Test Case 4 – Product Details

Test Case ID: WB04

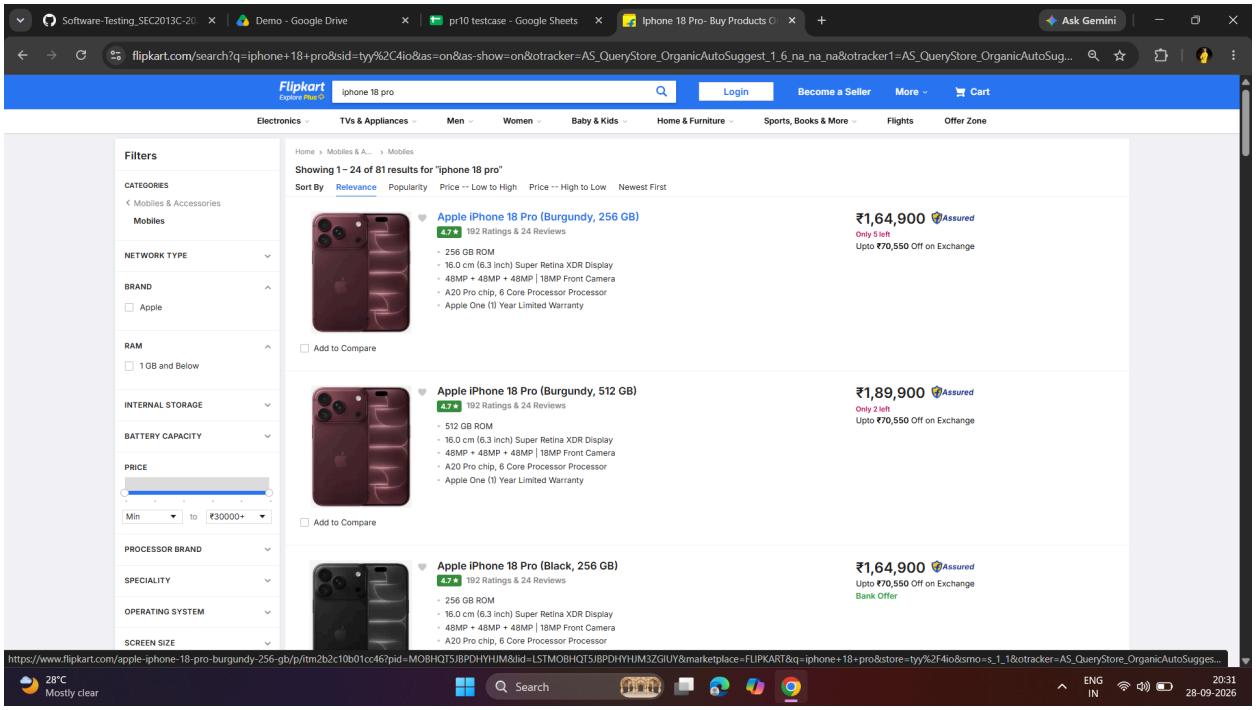

Test Case: Verify product details page

Test Steps: Select an iPhone 18 Pro product from the search results.

Expected Result: Product details page should be displayed with product image, variant, price and product information.

Actual Result: Product details page was displayed successfully with product image, variant, price and product information.

Status: PASS

Test Case 5 – Product Variant

Test Case ID: WB05

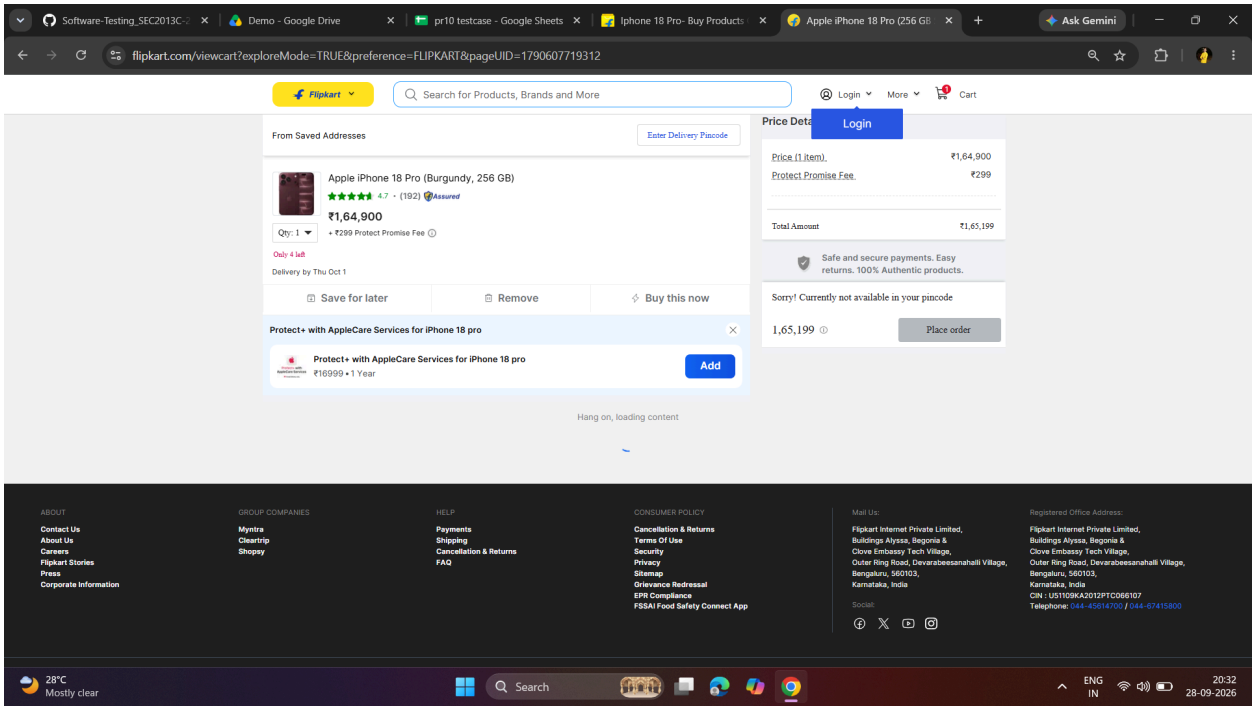

Test Case: Verify product storage variant selection

Test Steps: Open the iPhone 18 Pro product page and check the available storage variants.

Expected Result: Available storage variants such as 256 GB, 512 GB and other options should be displayed.

Actual Result: Storage variants were displayed successfully on the product page.

Status: PASS

Test Case 6 – Add to Cart

Test Case ID: WB06

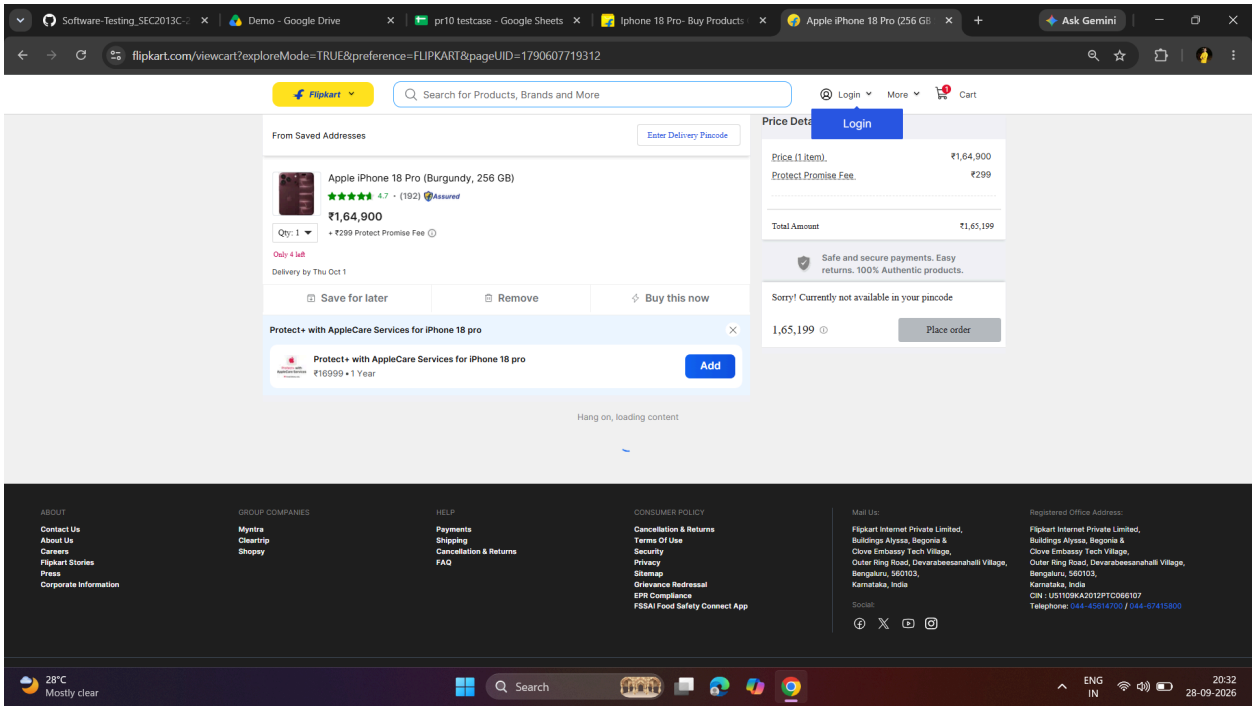

Test Case: Verify product is added to cart

Test Steps: Open the iPhone 18 Pro product page and add the product to the cart.

Expected Result: Selected iPhone 18 Pro should be added to the cart.

Actual Result: iPhone 18 Pro was successfully added to the cart.

Status: PASS

Test Case 8 – Login Page

Test Case ID: WB08

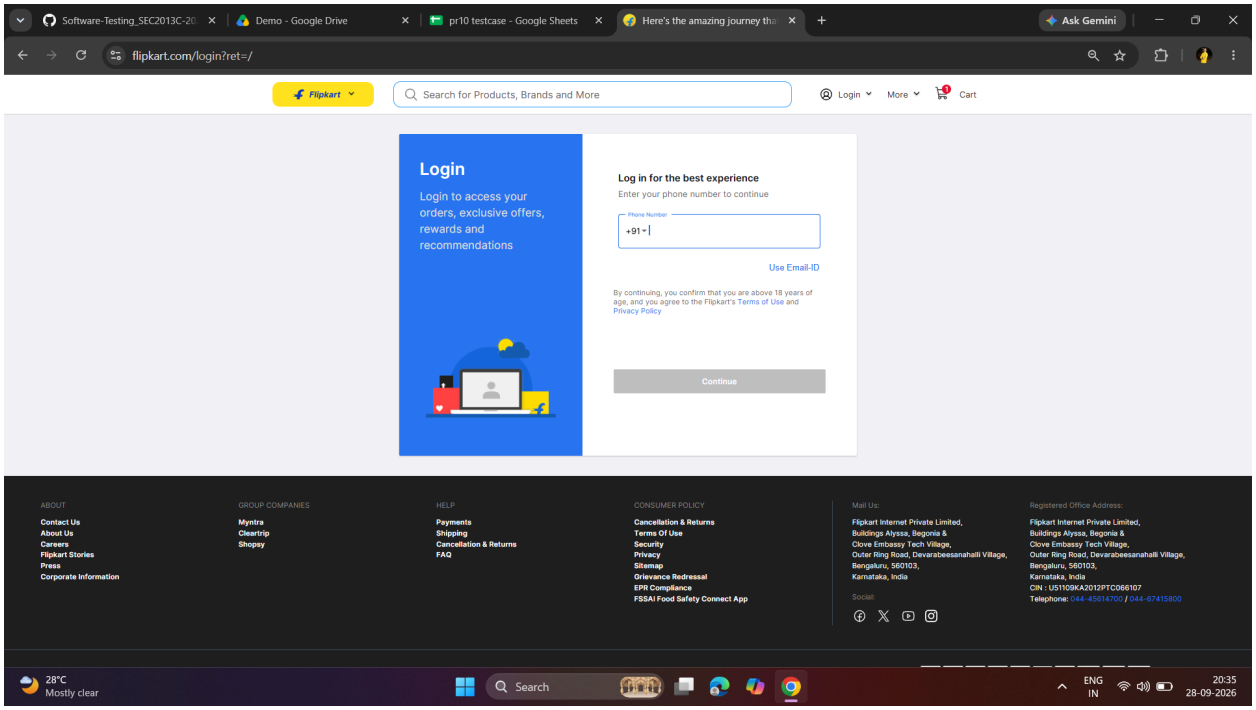

Test Case: Verify Flipkart login page is displayed

Test Steps: Click on the Login option from the Flipkart website.

Expected Result: Flipkart login page should be displayed with phone number/email login options.

Actual Result: Flipkart login page was displayed successfully with the phone number login option.

Status: PASS

Test Case 9 – Automation Homepage Test

Test Case ID: WB09

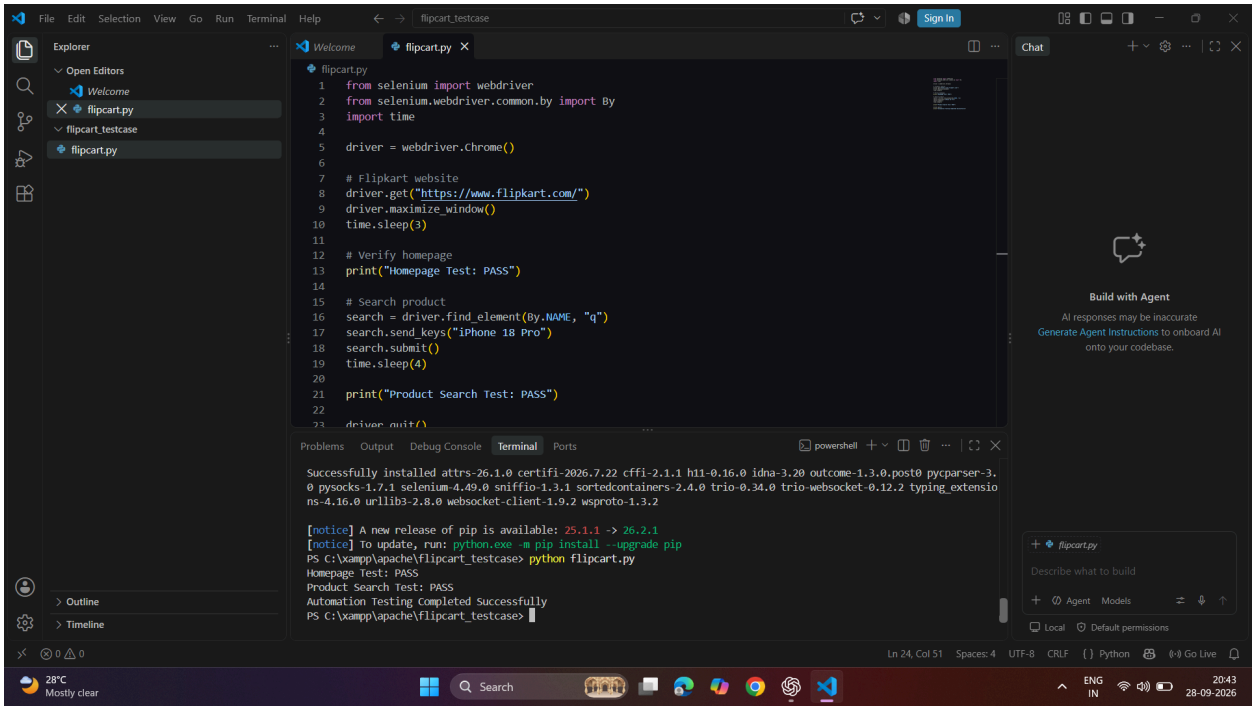

Test Case: Verify homepage using Selenium automation

Test Steps: Run the `flipcart.py` Python Selenium script in VS Code.

Expected Result: Flipkart homepage should open successfully and the homepage test should pass.

Actual Result: Homepage opened successfully and the terminal displayed **"Homepage Test: PASS"**.

Status: PASS

Test Case 10 – Automation Product Search Test

Test Case ID: WB10

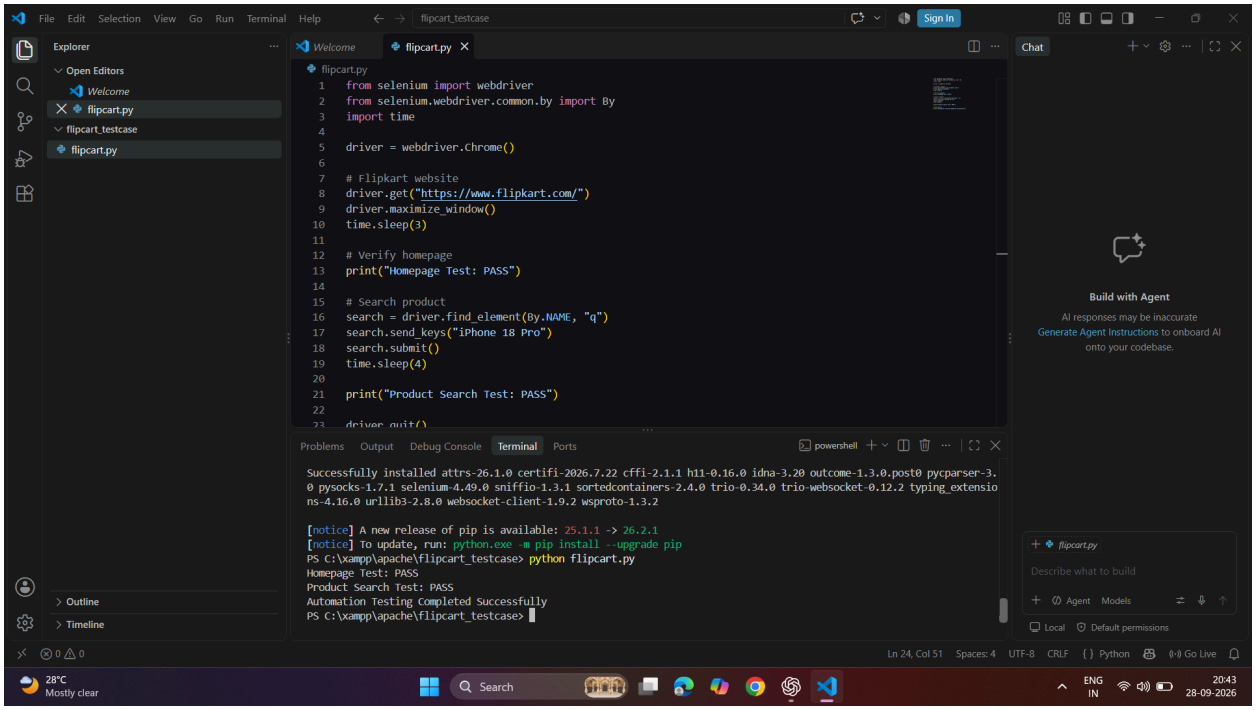

Test Case: Verify product search using Selenium automation

Test Steps: Run the `flipcart.py` Selenium script and verify the automated product search.

Expected Result: Product search should execute successfully and the test should pass.

Actual Result: Product search was executed successfully and the terminal displayed **"Product Search Test: PASS"** and **"Automation Testing Completed Successfully"**.

Status: PASS
